## Tower Bridge

## Exhibition

### What to expect from Tower Bridge Exhibition

A visit to Tower Bridge Exhibition is the most exciting way to explore and experience the most famous Bridge in the world. Within the Bridge's iconic structure and magnificent Victorian Engine rooms there is plenty to see and do!

After watching a new animated video about why Tower Bridge was built, guests can walk into the high level Walkways, 42 metres above the River Thames. This offers visitors the chance to admire stunning panoramic views of London, spying such popular landmarks as St Paul's Cathedral and the Monument to the west and St Katharine's Dock leading to Canary Wharf to the east.

The East Walkway houses the exhibition 'Great Bridges of the World' - this photographic exhibition features over 20 Bridges, each of which represents a breathtaking feat of engineering. In the south tower a short video shows the construction of the Bridge, before guests proceed to the West Walkway where they can view the Cities of the Modern Games Exhibition. This amazing and beautiful photographic exhibition showcases the 116 years' host cities and also lists key facts, medals won and outstanding athletic achievements.

Continue on to the original lifting machinery in the Victorian Engine

Rooms, complete with sounds and smells that transport you back in time to the Bridge's origins. You will also experience a virtual Bridge lift, providing you with a unique view of the Bascules being raised. A visit to the Gift Shop before leaving allows the chance to take home a memento of your day.

# Opening times

Summer opening hours:

April - September

10:00 - 18:00 (last admission 17:30)

Admission prices

<b>Adults</b>	£8.00
